Go in 10 Minutes (围棋十分钟)

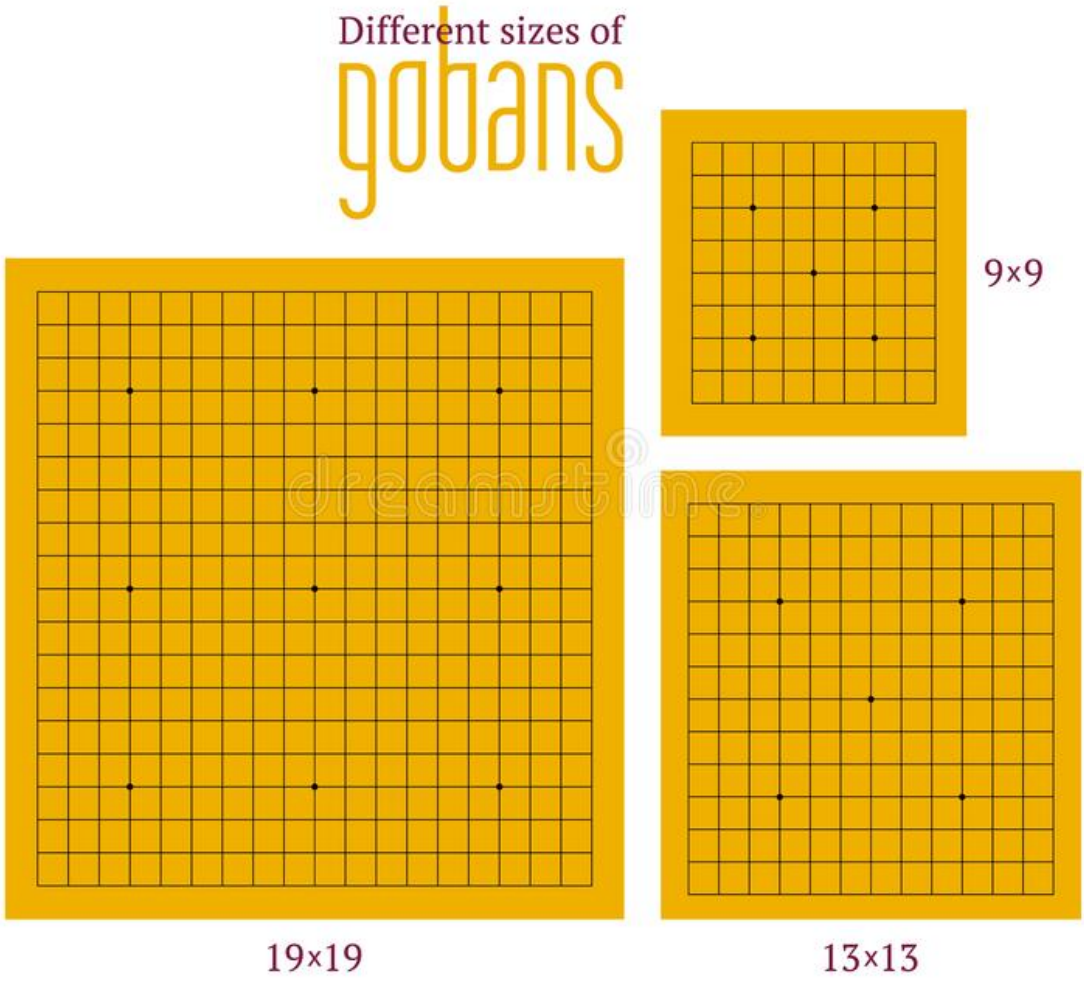

#Go #Beginner #Weiqi #Baduk #Introductory

History (历史)

- The game of **Go** or **Weiqi**(围棋) was invented in China a few thousands year ago (or **Baduk** in Korean) (ref: History). 围棋在中国被发明已经是好几千年了.

What do you need (需要些什么)

- A board with 9x9 lines (13x13 or 19x19). 一个九路(或其它的例如十三路,十九路)的棋盘.

- Some "Stones" (Black and White). 一些棋子(黑色和白色).

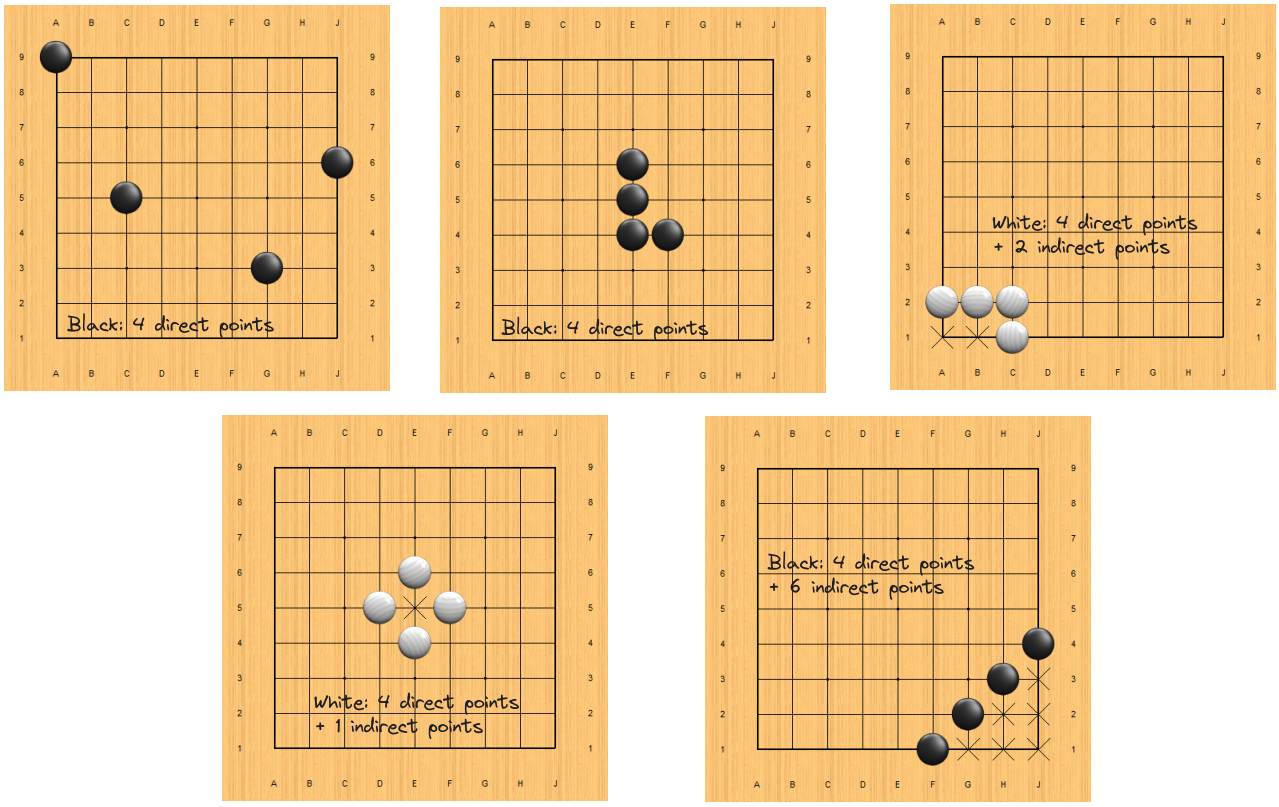

Objective (目的)

- ✓✓ To get more "**Points**" from the board than your opponent. 在棋盘上争夺比对手更多的"点"数.

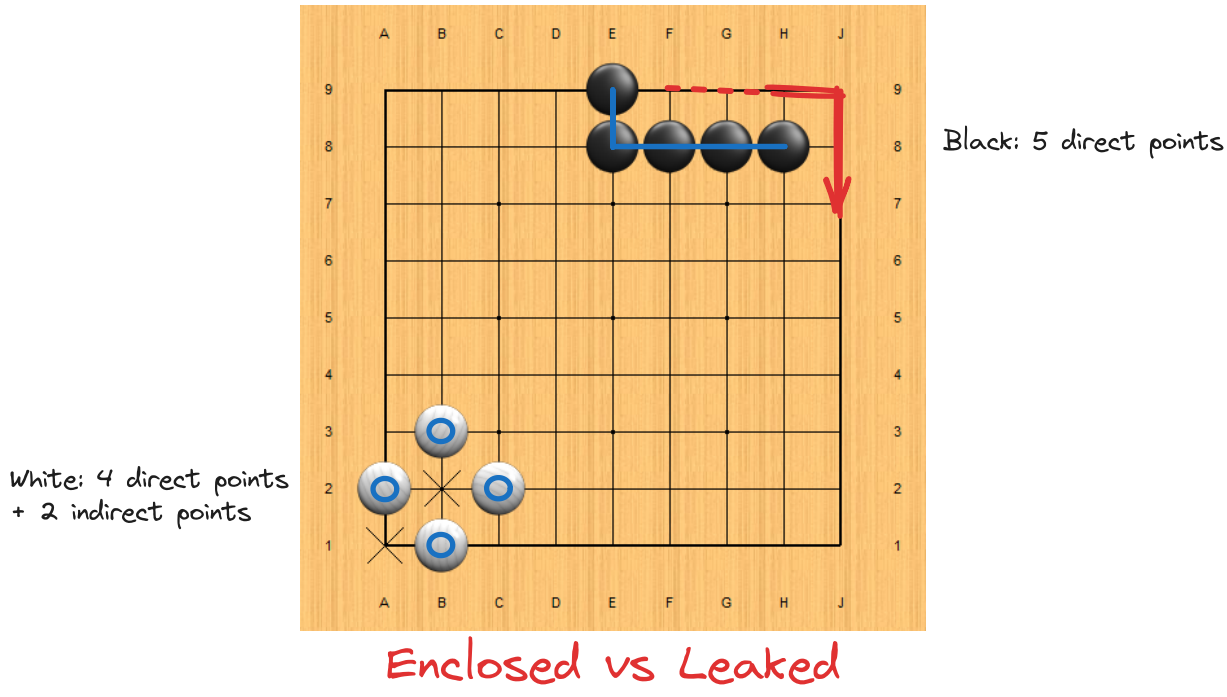

How to obtain "Points" (如何获得点数)

- Three methods (三种方法):
  1. Direct occupy (直接占据)
  2. Indirect occupy (间接围空)
  3. Captured stone (吃子/提子)

	Direct	Indirect	Captured stone
Chinese (数子法)	o	o	
Japanese (数目法)		o	o

- Emphasis of "**Leaked**" vs "**Surrounded**" territory. 强调关于"**侧漏**"对应"**围住**"的认知
- Understanding of "**standalone stone**" and "**string of stones**". 认识"**颗子**"和"**一串子**"

Qi (Liberty) of Stones (棋的气)

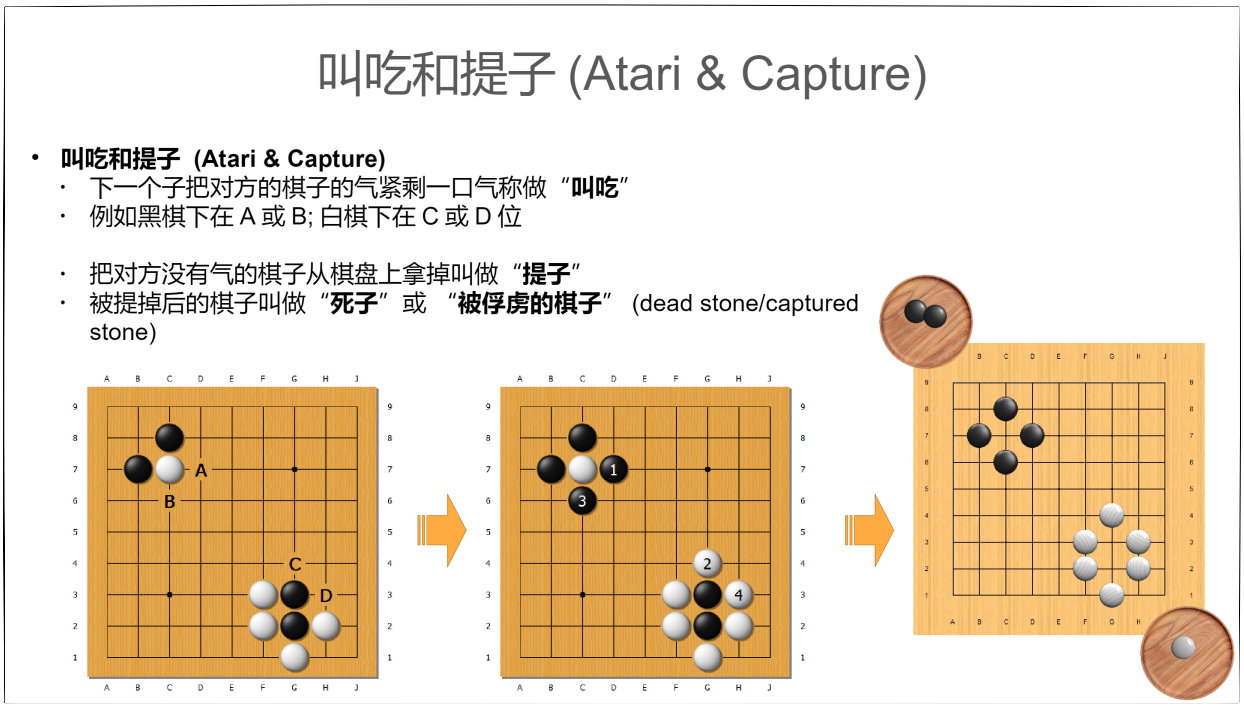

- Concept: 气 (Qi or Liberty) and 一串子(String of stones)

Enclosed Space (围住的空)

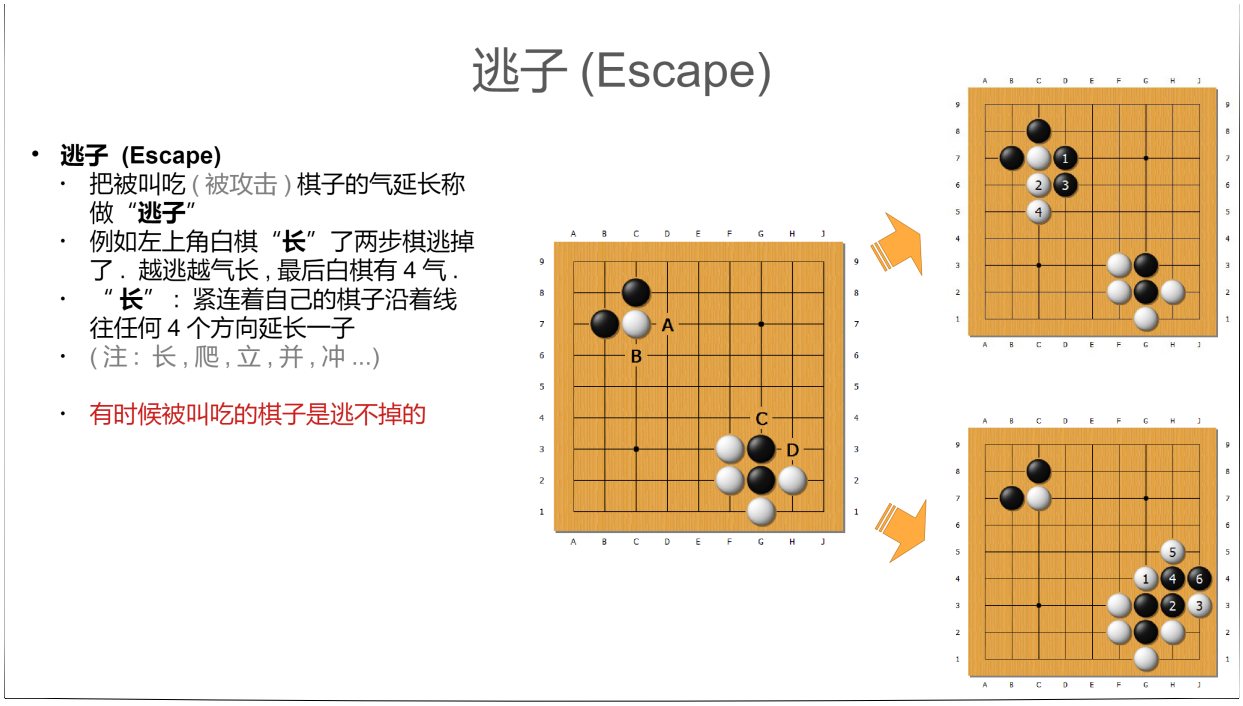

- The spaces surrounded by a single color of stones. 用同一种颜色围住的空地.

How to reduce opponent's "Points" (如何减少对手的"点")

- Capture of opponent's stone. 提吃对手的棋子

- How to avoid being capture. 如何避免被提吃

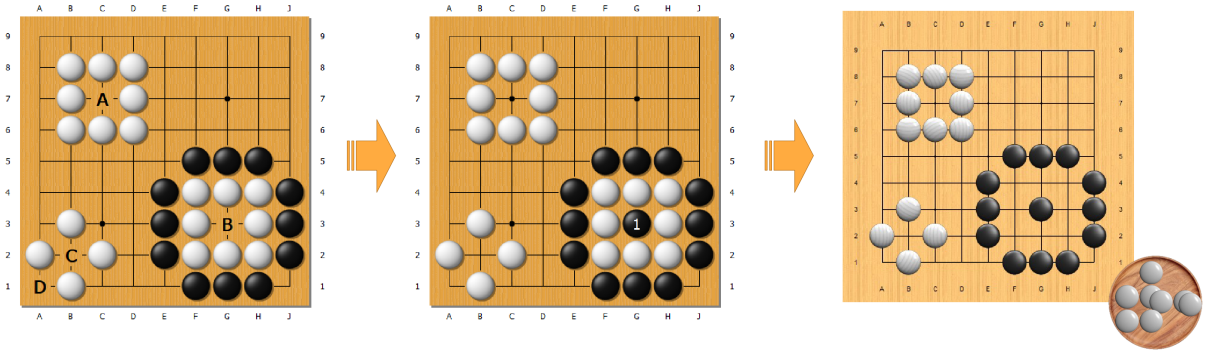

- Needs to gives warning 必须提示对手 >> says... "Atari" or "叫吃"
- Cannot have suicidal move (Illegal move). 不能下禁手

禁着点 (Illegal Point) - I

- **禁着点 (Illegal Point)**
  - A,C,D 的交叉点被白棋子团团围住而且这些白棋都还有气
  - 黑棋下在这里会马上没有“**气**”
  - 因此黑棋是不允许下在这些点 (A,C,D)

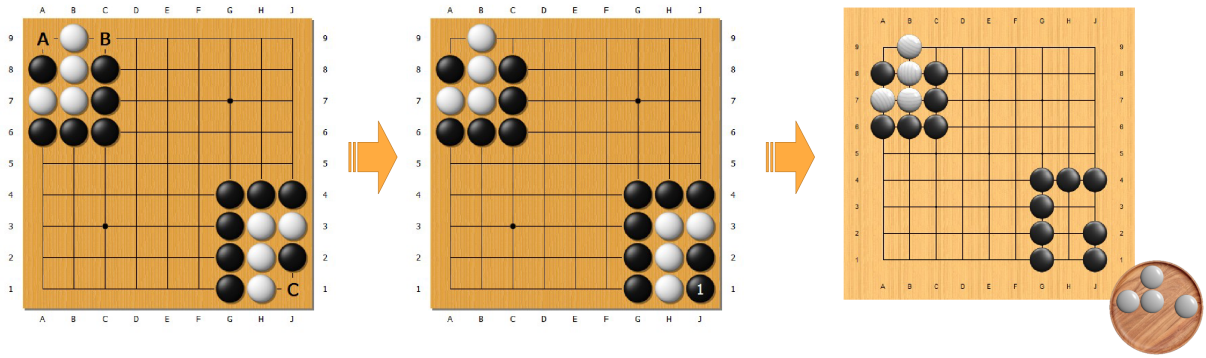

- **禁着点 (Illegal Point)**
  - B 的交叉点虽然也被白棋子团团围住但是右下这块白棋只剩下一口气
  - 黑棋下在这里白棋也是同时没有“**气**”
  - 因此黑棋可以把白棋全部提掉

禁着点 (Illegal Point) - II

- **禁着点 (Illegal Point)**
  - 左上因为白棋在 B 的交叉点还有一口气
  - 所以 A 位是黑棋的“**禁着点**”
  - 因此黑棋是不允许下在 A 点

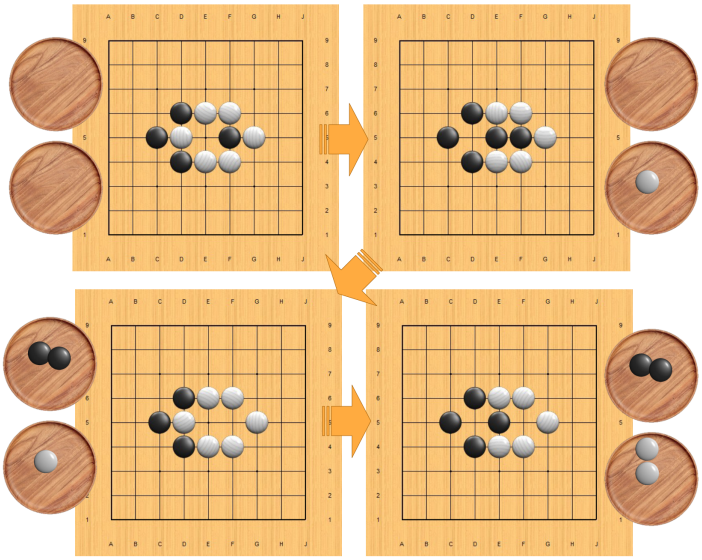

- **禁着点 (Illegal Point)**
  - 右下 C 的交叉点不是“**禁着点**”
  - 注意右下这块白棋只剩下一口气
  - 黑棋下在这里白棋也是同时没有“**气**”
  - 因此黑棋可以把白棋全部提掉

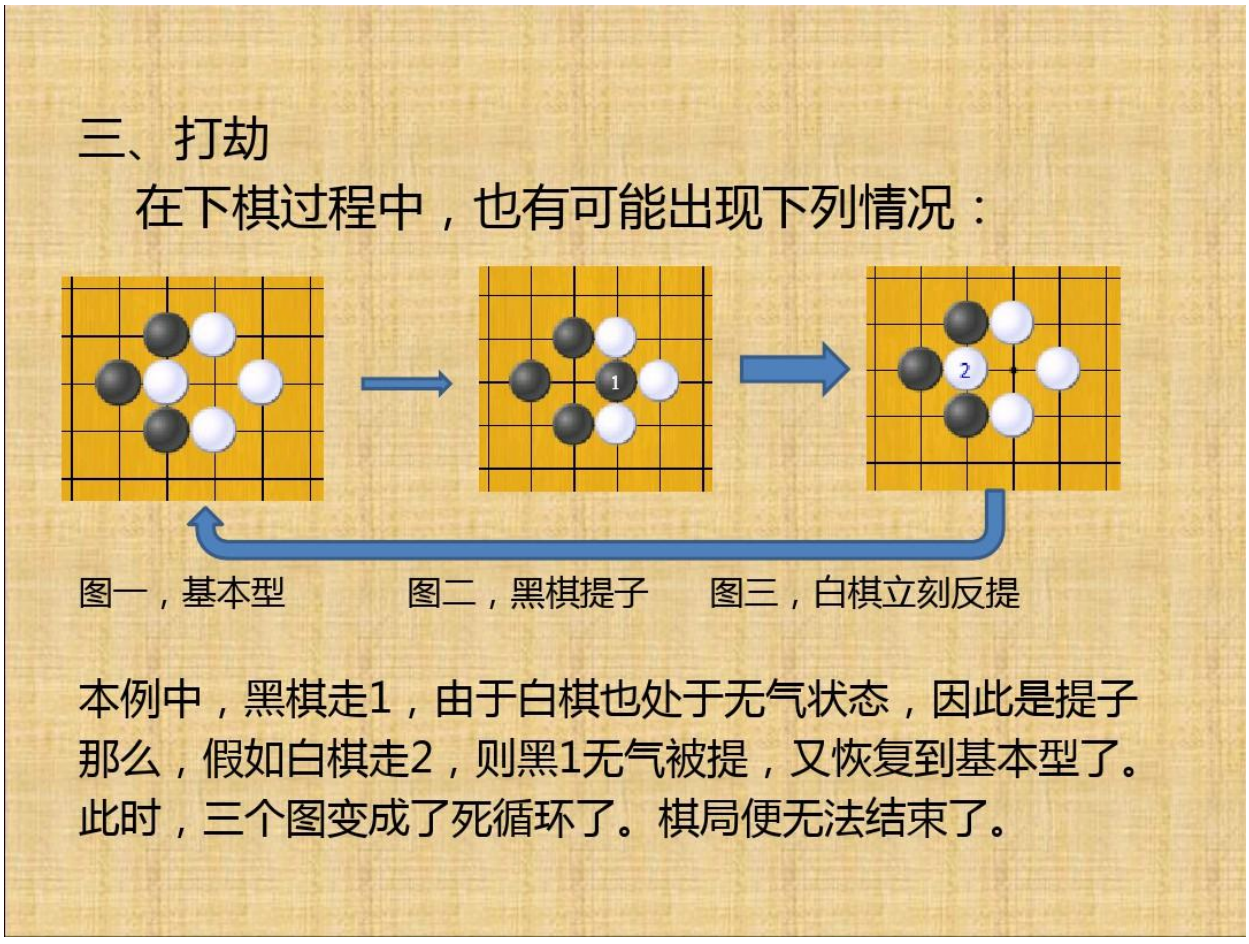

- Capture Two Recapture One (打二还一)

虎口，反提，打劫 (Tiger's Mouth, Recapture, Ko)

- **反提 (Recapture)**
  - 黑棋先在 E5 位提掉一颗白棋
  - 白棋在 D5 位“**反提**”两颗黑棋
  - 最后黑棋再在 E5 位“**反提**”一颗白棋
  - 这特殊的棋形叫做“**打二还一**”

- Ko Fight (打劫)

How to end a game (如何结束一盘棋)

- Game can end at any time. 任何时候都可以结束棋局
- Consecutive "Pass" from two players to signal the end of a game. 双方棋手连续各"虚手"一次表示棋局结束.
- Start to count "Points". 开始计"点".

Chinese counting (数子法)

- Total points = Direct occupy points + Indirect occupy points

Japanese counting (数目法)

- Total points = Indirect occupy points + Captured stones

Example of Counting (数棋的例子)

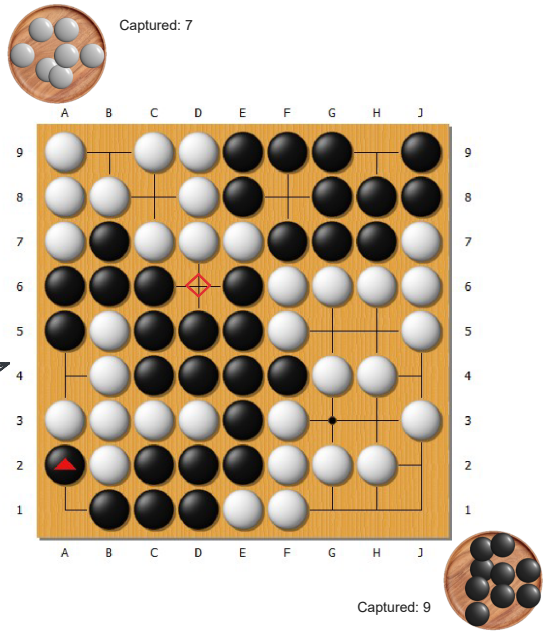

- **日本规则 - 数目法 (Japanese Rule)**
  - WHITE: 20.0 =
    11(Territory)
    + 9(Black's Dead)
    + 0.0(Komi)
  - BLACK: 25.0 =
    11(Territory)
    + 14(White's Dead)
  - **RESULT: B+5.0**
- **中国规则 - 数子法 (Chinese Rule)**

BLACK:
Direct occupy = 32
Indirect occupy = 11
Shared = 1/2 (@D6)
Total: 43.5

WHITE:
Direct occupy = 26
Indirect occupy = 11
Shared = 1/2 (@D6)
Total: 37.5

The RED colored space (D6) is important for Chinese rule but insignificant for Japanese rule

If play using Chinese rule this space will be taken by either side using direct occupy

How to WIN your game (如何赢下你的一盘棋)

- Before you make any move for every move think of the following 4 smaller objectives

Welcome to the Way of Go !!! 欢迎来到围棋的世界
